MEDICAL RESEARCH COLD CHAIN EQUIPMENT

COMPANY PROFILE

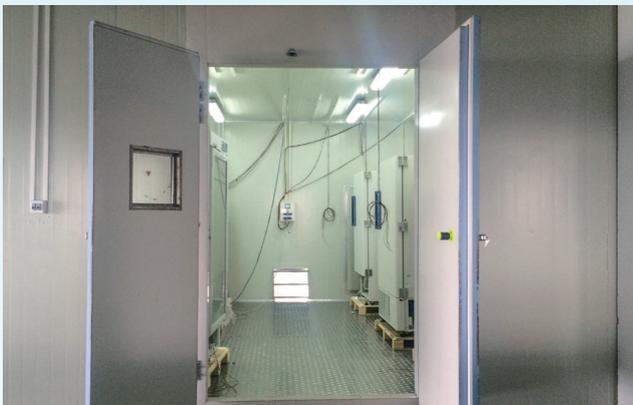

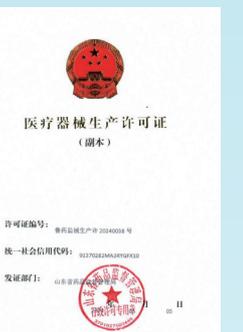

Qingdao Carebios Biological Technology Co.,Ltd. is located in Qingdao, China. We are a high-tech enterprise integrating R&D, production, sales and service with refrigeration technology as the core.

The medical, laboratory cryogenic cold chain, and laboratory general equipment under the company's own brand "Carebios" are widely used in Scientific Research and Pharmaceutical.

The company has a production base of 12,500 square meters to meet the growing market. At present, we have an annual production capacity of 15,000 units, leading of China.

Since our establishment, we has been adhering to "customer- centric ", based on differentiated products, stable quality, and reasonable cost as our purpose. Based in China, focusing on the global market, it actuate our business advancement have been very effective. At present, our products have been exported to Western Europe, North America, Australia, Africa and Southeast Asia.

We will continue to work hard to improve the user experience continuously, increase investment in new products and new technologies, and present all of you with an first-class service team.

Low Temperature Cold Chain Series Products

-150°C Cryo Freezer

• Application

-150°C Cryo Freezer provides a safer, more convenient and economical alternative long term storage method than LN2 containers. We design it to provide a storage environment that is about 20°C colder than the water recrystallization temperature. The freezer is suitable for storage of a variety of biological samples, such as virus, erythrocytes, leukocytes, cutis, skeleton, sperm, oceanic products, special test materials and even electronic products for testing. It can be installed in institutions including blood banks, hospitals, epidemic prevention service centers, research institutes and laboratories.

• Features

• Temperature Control System

- Microprocessor control, Large touch screen inner temperature clearly, and with easy viewing.
- The inner temperature can be adjustable at the range of -125°C~-150°C.
- Lock and password for protection to prevent arbitrary adjustment of operating parameters.

-150°C Cryo Freezer

DW-150W138

DW-150W226

• Safety protection measures

- Malfunction alarms: high temperature alarm, low temperature alarm, Sensor failure.
- Three alarming methods: buzzer alarming, digital flashing alarming and remote contacts.
- Protection function: power-on delay, time between stops.

• Refrigeration System

- Optimized cascade refrigeration technology, SECOP compressor to reach a high efficient refrigeration effect.
- Specially designed Heat Exchanger, heat transfer high efficient, save Energy.
- Independent engine cabinet cooling system, ensure to adapt to a higher ambient temperatures.
- CFC-Free overall situ polyurethane foaming insulation.
- CFC-Free refrigerant.

• Ergonomic Design

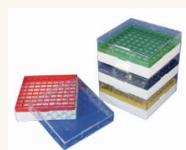

- Safety door lock, preventing unauthorized access.
- Wide voltage design from 192V to 242V.
- Stainless steel inner chamber, easy for clean.
- Heavy type caster and locking adjustable screw, easy to move and fix.

Wireless Monitoring system

-86°C ULT Freezer

• Application

-86°C ULT Freezer is specially designed for long term storage of various biological products, such as germs, virus, erythrocytes, leukocytes, cutis. It can be installed in institutions including blood banks, hospitals, epidemic prevention services, research institutes and laboratories for electronic and chemical plants, biological engineering institutes and marine fishery companies.

From individual laboratory users to ever-increasing sample storage needs, you can choose from ultra-low temperature storage solutions in multiple sizes.

• Features

• Temperature Control System

- Microprocessor control, Large touch screen display inner temperature clearly, and with easy viewing.
- The inner temperature can be adjustable at the range of -40°C~-86°C, with an increment of 0.1°C.
- Lock and password for protection to prevent arbitrary adjustment of operating parameters.
- Optional 7"color LCD touch screen display system.

-86°C ULT Freezer

DW-86L100

DW-86L280

DW-86L360

• Safety protection measures

- Malfunction alarms: high temperature alarm, low temperature alarm, Sensor failure, Power failure alarm, low voltage of backup battery, Over temperature alarm system, set the alarm temperature as requirements.
- Three alarming methods: buzzer alarming, digital flashing alarming and Remote alarm.
- Protection function: power-on delay, time between stops.

• Refrigeration System

- Optimized cascade refrigeration technology, SECOP compressor to reach a refrigeration effect.
- Specially designed Heat Exchanger, heat transfer high efficient, save Energy.
- V.I.P insulation panels to ensure the insulation performance.
- CFC-Free overall polyurethane foaming insulation.
- High efficient hydrocarbon refrigerant.

• Ergonomic Design

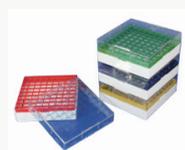

- Safety door lock, preventing unauthorized access. Wide voltage design from 192V to 242V.
- Double inner doors to reduce the loss of cold after opening the door.
- Suitable for 2" and 3" international standard Cryo Boxes;- Pressure-balanced port design, easy to open the door.
- Heavy type caster and locking adjustable screw, easy to move and fix.
- Ultra-simple condenser filter design, convenient for maintenance and washing.

-60°C Chest Deep Freezer

• Application

-60°C Low Temperature Freezer is mainly in order to meet the medical and scientific research and industrial preparation of cold storage under normal circumstances demand. It has large capacity, saving space and precise temperature control, temperature stability, quick cooling, mainly used in the sample access frequently, sample large capacity, users of laboratory space is relatively small.

• Features

• Temperature Control

- Microprocessor control, Large LED display inner temperature clearly, and with easy viewing.
- The inner temperature can be adjustable at the range of -30°C~-60°C.

-60°C Chest Deep Freezer

DW-60W300
DW-60W400

DW-60W200
DW-60W500

• Refrigeration System

- Optimized cascade refrigeration technology, SECOP compressor to reach a high efficient refrigeration effect.
- Specially designed Heat Exchanger, heat transfer high efficient, save Energy.
- Single compressor efficient thermal cycle refrigeration technology, low noise, more energy efficient.
- CFC-Free overall polyurethane foaming insulation.
- CFC-Free refrigerant.

• Safety Control

- Malfunction alarms: high temperature alarm, low temperature alarm, over temperature alarm system, set the alarm temperature as requirements.
- Two alarming methods: buzzer alarming and digital flashing alarming.
- Protection function: power-on delay, time between stops.

• Ergonomic Design

- Safety door lock, preventing unauthorized access.
- Wide voltage design from 192V to 242V.
- Baskets is standard.
- Heavy type caster and locking adjustable screw, easy to move and fix.

DW-40L280

DW-40L390

DW-40L590

• Refrigeration System

- Highly efficient SECOP brand compressor and high reliability fan.
- 90mm thick foam insulation, better insulation effect, help to maintain temperature stability inside the freezer.
- Optimized single refrigerant cooling system, easy maintenance and repair.
- CFC-Free overall polyurethane foaming insulation.
- CFC-Free refrigerant.

• Ergonomic Design

- Double inner doors to reduce the loss of cold after opening the door.
- Safety door lock, preventing unauthorized access.
- Wide voltage design from 192V to 242V.
- Suitable for 2" and 3" international standard Cryo Boxes.
- Pressure-balanced port design, easy to open the door.
- Heavy type caster and locking adjustable screw, easy to move and fix.
- Adjustable shelf design.
- Ultra-simple condenser filter design, convenient for maintenance and washing.

- Pressure-balanced port design, easy to open the door.
- Adjustable shelves design.
- Heavy type caster and locking adjustable screw, easy to move and fix.

• Refrigeration System

- Highly efficient famous brand hermetically sealed CFC free compressor and fan;70mm thick foam insulation, better insulation effect, help to maintain temperature stability inside the freezer, Forced-Air Circulation for large airflow with special air ducts to guarantee inner temperature consistency.
- Monoblock refrigeration units, energy-efficient and easy for maintenance.
- HCFC refrigerant.

-25°C Deep Freezer

• Safety Control

- Malfunction alarms: high temperature alarm, low temperature alarm, Sensor failure.
- Over temperature alarm system, set the alarm temperature as requirements.
- Two alarming methods: buzzer alarming and digital flashing alarming.
- Protection function: power-on delay, time between stops.

• Refrigeration System

- Highly efficient famous brand compressor and fan, with a high efficient refrigeration effect.
- Optimized refrigeration technology, low noise, more energy efficient.
- CFC-Free overall polyurethane foaming insulation.
- CFC-Free refrigerant.

• Ergonomic Design

- Safety door lock, preventing unauthorized access.
- Wide voltage design from 192V to 242V.
- Pressure-balanced port design, easy to open the door.
- Adjustable shelves design.
- Heavy type caster and locking adjustable screw, easy to move and fix.

• Application

Combined Refrigerator and Freezer suitable for hospitals, blood banks, epidemic prevention, animal husbandry areas, pharmaceutical companies and research institutes.

Designed to store pharmaceuticals, medicine, vaccines, biological materials, testing reagents and laboratory materials.

Microprocessor control, Large LED display inner temperature clearly, and with easy viewing. The inner temperature can be adjustable at the range of 2°C~8°C and -10°C~ -25°C, with an increment of 0.1.

• Features

• Temperature Control

- Microprocessor control, Large LED display inner temperature clearly, and with easy viewing.
- The inner temperature can be adjustable at the range of 2°C~8°C and -10°C~ -25°C, with an increment of 0.1.
- The Lowest and Highest temperature recorded value record.

-25 °C/4°C Combined Refrigerator And Freezer

-25 °C/4°C Combined Refrigerator And Freezer

Combined Refrigerator and Freezer

• Safety Control

- Malfunction alarms: high temperature alarm, low temperature alarm, Power failure alarm, Door jammed, low voltage of backup battery.
- Over temperature alarm system, set the alarm temperature as requirements.
- Three alarming methods: buzzer alarming, digital flashing alarming and Remote alarm.
- Protection function: power-on delay, time between stops.

• Refrigeration System

- Highly efficient famous brand compressor and fan, with a high efficient refrigeration effect.
- Forced-Air Circulation for large airflow with special air ducts to guarantee inner temperature consistency.
- Large area of the evaporator design, cooling strong and high temperature uniformity, While effectively suppressing frost, reducing defrosting process.
- CFC-Free/HCFR refrigerant.

• Ergonomic Design

- Safety door lock, preventing unauthorized access.
- Auto defrost function guarantees a good performance in high ambient temperature and humidity area.
- Wide voltage design from 192V to 242V.
- Inner LED lighting and caster design.
- Adjustable shelves design.
- No condensation glass door.
- Foaming door is optional.
- Stopper on rear against back wall.

FAQ

Temperature And Humidity Wireless Monitoring Cloud Platform

Product Introduction

Smart Sensor

Smart Box

Management Cloud

Temperature and humidity wireless monitoring system consists of three parts:

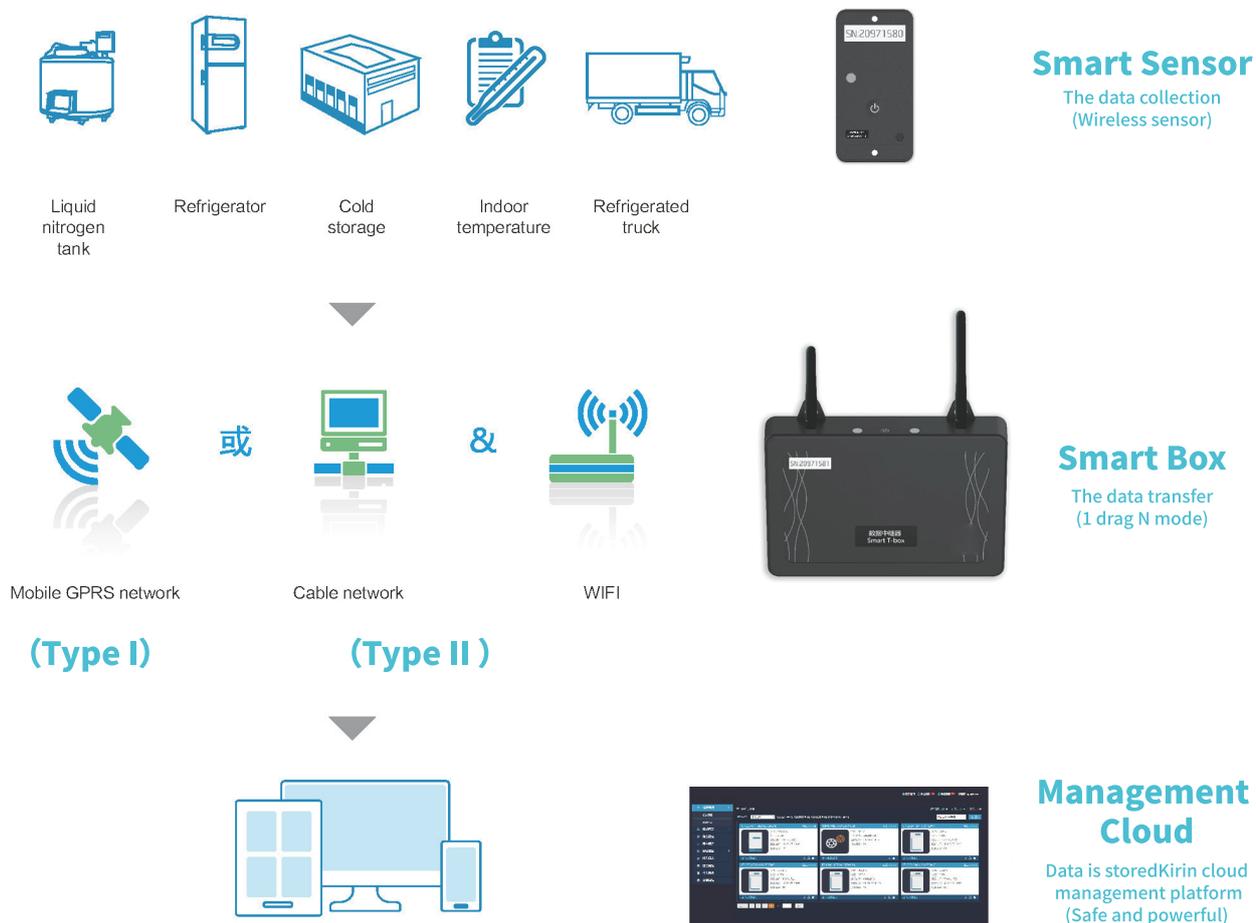

smart sensor,smart box and management cloud.Users only need to register and log in to the management platform to achieve device Settings, data viewing and download, when the warning value exceeds, the system automatically pushes alarm information through SMS, email and WECHAT.

This system can strictly test the environment and equipment:

1. Monitoring environment: warehouse, clean room, blood bank, pharmacy, cold storage, animal room, laboratory;
2. Monitoring equipment: stability test box, freezer, refrigerator, constant temperature and humidity box, ultra-low temperature refrigerator, liquid ammonia box, oven.

• Product Topology Diagram

After the data is collected by various sensors (SMART SENSOR), the data repeater (SMART BOX) via mobile GPRS network (Type I), wired network or WIFI mode (Type II)

Upload management platform, users only need to register, login to achieve monitoring and management.

• Basic Parameters

MODEL	Temperature Range	Humidity Range	Temperature Error	Humidity Error	Temperature Resolution	Power Supply mode	Frequency of operation	Installation method
Smart sensor T1	-20C—60C	0-100%RH	±0.2°C	±0.2%RH	0.01	Internal power supply (replaceable)	425-441Mhz	The module is placed inside the device
Smart sensor T2	-200C-150C	—	±0.5°C	—	0.01	Internal power supply (replaceable)	425-441Mhz	The probe is placed inside the device

• Product Features

SMART TRANSMISSION

Internet of things LORA technology, optimal transmission path for intelligent matching data.

ULTRA LOW POWER CONSUMPTION

The built-in power supply can work independently for more than two years and easily replace the battery or use USB charging.

REMOTE TRANSMISSION

Effective transmission distance greater than 200 meters to ensure signal permeability and data stability.

ULTRA THIN BODY

Compact size, convenient and flexible, with waterproof, dust-proof, moisture-proof and other characteristics.

• **Data Repeater**

Wireless data repeater
(Smart T-BOX)

• **Basic Parameters**

MODEL	Use Temperature	Storage Capacity	Network System	External Antenna	Power Supply Mode	Frequency Of Operation	Installation method
Smart T-Box	Normal Temperature Environment	In-buit datastorage TCard	Type I:GPRS Type II:WIF	Select antenna or gain antenna according to actual requirements	Interna power. USBcharging	425-441Mhz	The module is placed in a room temperature environment and has a power supply

• **Product Features**

ULTRA LOW POWER CONSUMPTION

Internal power can work independently for more than 7 days.

WIDE DOMAIN NETWORK

Up to 255 acquisition modules can be uploaded.

AUTOMATIC FREQUENCY CONVERSION

When the frequency is disturbed by the outside world, it can automatically transfer to the undisturbed frequency for data transmission to ensure that the data is stable and reliable.

FREEDOM OF NETWORKING

Data transmission by means of GPRS / cable network / WIFI to meet global user needs.

Temperature And Humidity Wireless Monitoring Cloud Platform

- **Wireless Monitoring Cloud**

41

- **Functions**

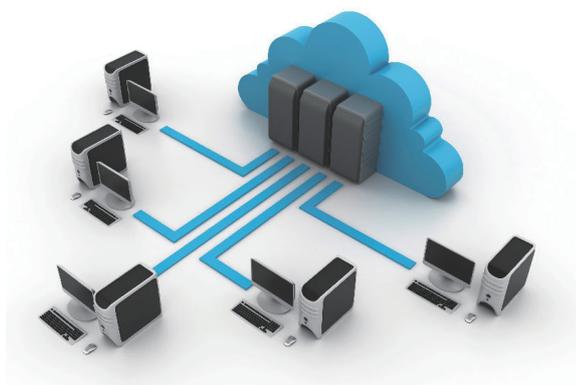

01	02	03	04
<p>Full Monitoring</p> <p>The target monitoring-object can be achieved 24 hours a day, at any location, the whole process of uninterrupted monitoring and management.</p>	<p>Data Storage</p> <p>Automatic recording, preservation of all monitoring data and downloadable as required</p>	<p>Remote Warning</p> <p>When the monitoring-data exceeds the default threshold, remote warning can be achieved through SMS, email, Wechat APP, etc...</p>	<p>Record Report</p> <p>Monitor data records can form data reports according to user needs to facilitate filing and filing</p>

• **Product Features**

01/

Stable and reliable cloud server

Relying on Alibaba Cloud's mature solutions to establish a professional management platform, data security, stability, reliable system. The platform can be updated in real time, which greatly reduces the user's use and operation and maintenance costs, and improves the use efficiency.

02/

Convenient and efficient management logic

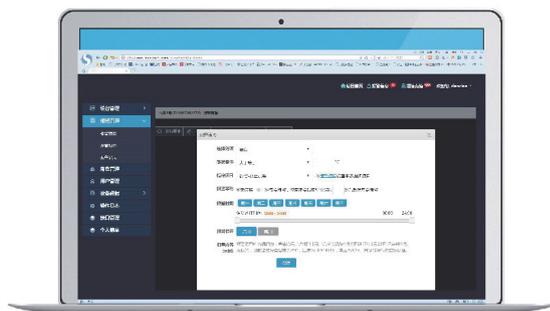

Users can carry out convenient and efficient management operations on the cloud management platform anytime and anywhere through computers, mobile phones, wechat, tablets, etc.

03/

Simple and beautiful application interface

Through professional and humanized industrial design, it presents a first-class simple and beautiful application interface, so that users can operate and use pleasing to the eye. Users can log in to the management platform using 8 modules: Device management, alarm management, role management, user management, device data, operation log, interface management, personal information rights function.
